

# Aditya Nair

---

I am a computational and systems neuroscientist working at the intersection of neurobiology, machine learning, and dynamical systems. I combine neural imaging, electrophysiology, and generative machine learning tools to understand social behaviors such as aggression and mating. My goal is to uncover key computational properties of neural circuits and re-conceptualize neuropsychiatric disorders as impaired neural computations.

EDUCATION

|   |                                |
|---|--------------------------------|
| <b>California Institute of Technology</b><br>PhD., Computation & Neural Systems   | 2019-<br>Present               |
| Primary Advisor: David J. Anderson, <i>Caltech</i><br>Co-Mentors: Scott W Linderman, <i>Stanford Uni.</i><br>Ann Kennedy, <i>Scripps Research Institute</i> | Expected<br>Graduation<br>2024 |
| <b>National University of Singapore</b><br>B.S., Life Sciences,<br><i>Honors with Highest Distinction</i>   | 2014-<br>2018                  |
| <b>Karolinska Institute</b><br>Exchange Semester<br><i>Erasmus Scholar</i>  | 2017                           |

RESEARCH EXPERIENCE

|   |                  |
|---|------------------|
| <b>California Institute of Technology</b><br>A*STAR National Science Graduate Fellow in Neuroscience,<br>Advisor: David J. Anderson.<br><i>(1) Identified computational circuit motifs that control the integration of aggressive states in the hypothalamus.</i><br><i>(2) Extensively collaborated with experimentalists to apply unsupervised, machine learning based dynamical systems methods to neural and behavior data.</i> | 2019-<br>Present |
| <b>Institute of Molecular and Cell Biology, Singapore</b><br>Research Officer. Advisors: Weiping Han, George Augustine.   | 2018-<br>2019    |

*Discovered a neural mechanism for co-release of opposing neuromodulators by combining slice electrophysiology and computational modeling.*

**Nanyang Technological University, Singapore** 2017-  
 Honors Researcher. Advisor: George J. Augustine. 2018  
*(1) Uncovered the neuromodulatory role of cholinergic inputs to the claustrum. (2) Dissected the composition of cell types in the striatum, claustrum, and cerebellum.*

**Karolinska Institute, Sweden** 2017  
 Undergraduate Researcher. Advisor: Gilad Silberberg,  
*Created ML methods for 3D automated reconstruction of neuronal morphology from fluorescent images.*

**National Neuroscience Institute, Singapore** 2015-  
 Undergraduate Researcher. Advisor: Lim Kah Leong, 2017  
*(1) Studied the role of Parkin and Lipoprotein lipase in Parkinson's disease (2) Created user-friendly computer vision methods for automated analysis of fluorescent images.*

AWARDS AND HONORS

Peter and Patricia Gruber International Research Award, 2024  
 Gruber Foundation and Society for Neuroscience

NIH NeuroAI Early Career Scholar 2024

National Science Graduate Scholarship, Agency of Science, 2019-  
 Technology and Research, Singapore (A\*STAR) 2024

National University of Singapore Science and Technology 2014-  
 Undergraduate Scholarship 2018

Simons Foundation Award, Gordon Research Conference 2019  
 (GRC) for Modulation of Neural Circuits and Behavior

Trainee Professional Development Award, 2018  
 Society for Neuroscience

Erasmus Plus Undergraduate Scholarship 2017

PREPRINTS AND  
SUBMITTED  
WORKS

INVITED TALKS

- **Cosyne 2023, Montreal, Canada**  
**Workshop on Generative Models for Neuroscience.**  
Latent dynamical models discover state dependent line attractor-like representations in the hypothalamus during social behavior.
- **Gordon Research Conference (GRC) on the Hypothalamus, 2022, Ventura, CA**  
An approximate line attractor in the hypothalamus that encodes an aggressive internal state.
- **Cosyne 2022, Cascais, Portugal.**  
Dynamical systems analysis reveals a novel hypothalamic encoding of state in nodes controlling social behavior.  
*(Selected from top 3% of all submissions)*

- **Society for Claustrum Research Meeting, Salk Institute, 2018, San Diego, CA**

The claustrum receives neuromodulatory input from the basal forebrain.

CONFERENCE  
PRESENTATIONS

- Amit Vinograd\*, **Aditya Nair\***, Scott W Linderman, David J Anderson.  
Neural implementation of a hypothalamic line attractor encoding an internal state.  
*HHMI Annual Science Meeting, 2023*
- **Aditya Nair**, Martin Graf, George J. Augustine.  
Opposing cholinergic gain control of the claustrum.  
*Society for Neuroscience 49th Annual Meeting, 2019.*
- **Aditya Nair**, Martin Graf, George J. Augustine.  
Opposing cholinergic gain control of the claustrum.  
*Gordon Research Conference on Neuromodulation, 2019, Awarded Simon's Foundation Award for best poster.*
- **Aditya Nair**, Martin Graf, George J. Augustine.  
Cell-type specific cholinergic modulation of the claustrum.  
*Society for Neuroscience 48th Annual Meeting, 2018. Awarded Trainee Professional Development Award, SfN.*

REVIEWING  
EXPERIENCE

Neuron

TEACHING  
EXPERIENCE

**Co-organizer and Lecturer** 2023,  
Chen Institute Data Science and AI for Neuroscience 2022  
Summer School, *Caltech*  
*I co-founded and organized a summer school for computational neuroscience, creating a curriculum, lecture series and homework notebooks.*

**Guest Lecturer, CNS 220: Genetic Dissection of Neural Circuit Function, Caltech** 2021-2024  
*I teach a section focused on computational approaches to understand cell-type specific computations in social behavior.*
